EDUCATION

- National University of Computer and Emerging Sciences** Islamabad, Pakistan
Bachelor of Science in Computer Science Sep 2021- June 2025
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Networking, Databases, Object Oriented Programming, Website Development, Natural Language Processing, Blockchain and Cryptocurrency , Game Development and Design

SKILLS SUMMARY

- Languages:** Python, C , C++, JavaScript, SQL, C#, Assembly Language
- Frameworks:** NodeJS, MERN, GO Lang
- Tools:** Docker, GIT, MongoDB, MySQL, Unity3D, Jenkins, MLFlow
- Soft Skills:** Leadership, Event Management, Public Speaking, Time Management, Goal Oriented

EXPERIENCE

- Huawei Technologies (via Hillcrest)** Islamabad, Pakistan
Network Design Architect – Cloud Core January 2026 – Present
 - Cloud Core Operations:** Supporting telecom core network operations within the Cloud Core domain, working on cloud-native core components and enterprise-grade telecom solutions as a Hillcrest-deployed resource at Huawei.
 - Telecom Network Design:** Assisting in the design, analysis, and optimization of core network architectures to ensure scalability, reliability, and high availability.
- Xperion** Remote
JavaScript Developer January 2026
 - Client-Based Development:** Working with Xperion's client *Agentic Dream* , contributing to the development and maintenance of internal tools used across their organization.
 - Frontend Development:** Developing and maintaining production-grade frontend features using JavaScript, with a focus on clean code, performance, and usability.
 - Bug Fixing & Enhancements:** Identifying and resolving bugs while implementing feature enhancements to improve application stability and overall user experience.
- Huawei Technologies** Islamabad, Pakistan
Fresh Blood Induction Program - Intern September 2025 – December 2025
 - Cloud Core:** Gained hands-on understanding of telecom network architectures, including 2G, 3G, and 4G, and studied real-time call flows within the Cloud Core domain.
 - Internal Process:** Became familiar with Huawei's internal operating procedures and supported multiple post-sales activities as part of the team.
- SRS Solusi Digital** Remote / Indonesia
Full Stack Developer (MERN) November 2025
 - Payment Integration:** Integrated DOKU Payment API across backend and frontend systems, ensuring secure and seamless transaction workflows.
 - Logistics Integration:** Implemented Biteship API to automate shipment rate retrieval and streamline order fulfillment processes.
 - Full Stack Development:** Developed and maintained core product features using the MERN stack, contributing to both frontend UI and backend services.
- NADRA Headquarters** Islamabad, Pakistan
AGHAAZ Summer Internship Program - Intern May 2024 – June 2024
 - Asset Management Web Application:** Developed a web application for efficient asset tracking and storage, improving organizational asset management.
 - NADRA Operational Systems:** Gained foundational knowledge of NADRA's network infrastructure and data management processes.
- Hexler Tech** Islamabad, Pakistan
Intern January 2024
 - Web Application Development:** Developed responsive and user-friendly web applications using React.js, HTML, CSS, and JavaScript.
 - UI Component Implementation:** Assisted in building reusable UI components while following best practices and design guidelines.
 - Adaptability & Collaboration:** Demonstrated strong adaptability and collaboration skills in a fast-paced development environment.

PROJECTS

- **LingoLearn(FYP) - Language Learning App [AR, NLP, Unity]**: Developing an AR-based language learning app using Unity, integrating NLP for interactive lessons, immersive AR scenarios, and assessments.
- **Emotion Trends Tracker [NLP, Temporal Analysis]** : Analyzed Roman Urdu diary corpus to detect sentiment shifts over time, using semi-supervised labeling and Matplotlib for trend visualization.
- **Robot Simulation [C++, Operating Systems]**: Simulated 50 processes with inter-process communication using threads, pipes, shared memory, and process scheduling to estimate exit width.
- **Text-to-Image Microservice [NLP, GRPC]** : Built a gRPC-based microservice to generate context-aware images from text using open-source models. Deployed with GitHub Actions and demoed via Streamlit and Postman.
- **New Age Grocery Store [C++, OOP, File I/O]**: Designed a role-based retail backend with secure user management, inventory control, and order processing. Implemented payment logic and checkout simulation using C++ classes and persistent file handling.
- **Timetable Scheduling Optimization [Python]** : Implemented an optimization algorithm in Python to generate efficient and conflict-free timetables.

HONORS AND AWARDS

- **Vice President** of IEEE (CS branch) since 2024
- **Deputy Secretary Protocol** of NASCON 2025
- **Dean's Honor List, FAST National University — 7th Semester**

VOLUNTEER EXPERIENCE

- | | |
|---|--|
| ● Organizer at the IEEE International Multitopic Conference (INMIC)
<i>Managed event coordination and logistics for the international conference.</i> | Fast NUCES, Islamabad
2022 |
| ● Volunteer at Ideas Foundation
<i>Organized charity events and drives for orphans and the underprivileged.</i> | Islamabad, Pakistan
May 2022 - September 2024 |
