Islamabad, Pakistan (Open to Remote)

SUMMARY

Full-stack engineer with 1.5+ years shipping production web applications across six engineering teams. Strongest in the MERN stack (React.js, Node.js, Express.js, MongoDB) with hands-on delivery of enterprise API integrations (NetSuite, Jira, KnowBe4, DOKU Payments), AI-agent tooling, and containerized services released through CI/CD.

EDUCATION

- National University of Computer and Emerging Sciences (FAST-NUCES)** Islamabad, Pakistan
Bachelor of Science in Computer Science September 2021 – June 2025
 - Honors:** Dean's Honor List, FAST National University

EXPERIENCE

- Agentic Dream (via Xperion AI)** Remote (Concurrent Role)
JavaScript Developer January 2026 – July 2026
 - Product Development:** Developed and maintained internal tooling powering core product workflows across 2 production applications, shipping features end-to-end from React interfaces to Express.js service layers.
 - Frontend Engineering:** Built 20+ reusable React components and dashboard views, eliminating duplicated UI code and reducing average page load time from 3.4s to 1.6s.
 - API & Integration Engineering:** Designed and consumed REST integrations against third-party enterprise APIs, implementing token-based authentication, pagination, error handling, and retry logic to keep data in sync across 3 external systems.
 - Debugging & Collaboration:** Diagnosed and resolved 60+ defects while delivering feature enhancements, working in a 5-person cross-functional team with Git-based code review and 2-week Agile sprints.
- Dafinitiq AI** Islamabad, Pakistan (On-site)
Full Stack Developer April 2026 – June 2026
 - Full Stack Development:** Delivered features across 3 client web applications using the MERN stack, owning both React interfaces and Express.js/MongoDB service layers.
 - Performance & Optimization:** Reduced page render time by 35% by memoizing React components and optimizing MongoDB queries and indexes on high-traffic endpoints.
 - Agile Delivery:** Shipped 15+ features across 5 two-week sprints under tight deadlines, maintaining code quality through peer review.
- Huawei Technologies** Islamabad, Pakistan (On-site)
Network Design Architect – Cloud Core (via Hillcrest) January 2026 – March 2026
 - Cloud Core Operations:** Supported operations and maintenance of cloud-native telecom core components carrying enterprise-grade traffic, assisting with fault analysis and service restoration.
 - Architecture & Performance Analysis:** Assisted in designing and analyzing scalable core network architectures for high availability, and analyzed performance data to drive optimization of service stability.
- Fresh Blood Induction Program – Intern** September 2025 – December 2025
 - Cloud Core Training & Operations:** Completed structured training on 2G/3G/4G core architectures, traced real-time call flows within the Cloud Core domain, and supported post-sales technical operations alongside senior engineers.
- SRS Solusi Digital** Remote / Indonesia
Full Stack Developer (MERN) November 2025
 - Payment Integration:** Integrated the DOKU Payment API end-to-end, enabling secure card and e-wallet checkout with webhook-based transaction verification.
 - Logistics Automation:** Implemented the Biteship API to automate shipping-rate calculation across 5 courier services, removing manual quoting from the order fulfillment flow.
 - Full Stack Development:** Delivered features across MongoDB, Express.js, React.js, and Node.js for an Indonesian e-commerce platform, collaborating remotely across a 2-hour time-zone difference.
- NADRA Headquarters** Islamabad, Pakistan
AGHAZ Summer Internship Program – Intern May 2024 – June 2024
 - Web Application Development:** Built an asset-management web application to track and manage organizational resources across 6 asset categories, with role-based access control.
- Hexler Tech** Islamabad, Pakistan
Frontend Developer – Intern January 2024 (1 month)
 - Frontend Development:** Developed responsive web interfaces with React.js, HTML5, CSS3, and JavaScript, ensuring cross-browser and mobile compatibility.
 - Reusable Components:** Built 15 modular UI components adopted across the team's projects, reducing duplicate markup and shortening feature delivery time.

PROJECTS

- **DreamIt — Internal Integrations Platform** dreamit.agenticdream.com
React.js, Node.js, Express.js, MongoDB, REST APIs, OAuth *4-person team*
 - Unified NetSuite, KnowBe4, and Jira behind a single React interface, giving a 15-person team one workspace in place of 3 separate tools.
 - Implemented token-based OAuth authentication, scheduled background data sync, and a normalized REST integration layer across all three vendor APIs.
 - Reduced recurring SaaS subscription spend by roughly 30% by retiring redundant seat licenses.
- **Actragen — Multi-Agent AI Platform** actragen.thebetop.com
React.js, Node.js, LLM APIs, AI Agents, REST APIs *3-person team*
 - Built a web platform where 6 specialized AI agents automate business workflows including report generation, data summarization, and content drafting.
 - Developed the agent-facing UI and the API layer that routes each user request to the correct agent and streams results back to the client.
 - Cut manual report turnaround from around 4 hours to under 10 minutes.
- **Text-to-Image Microservice** *Personal Project*
Python, gRPC, Docker, GitHub Actions, Streamlit, Generative AI
 - Built a microservice that generates context-aware images from text prompts using open-source generative AI models.
 - Designed a gRPC-based service architecture for low-latency inter-service communication, containerized with Docker.
 - Automated build and deployment through GitHub Actions CI/CD, sustaining a median end-to-end generation time of about 8s.
- **LingoLearn — AR Language Learning Platform** *Final Year Project*
Unity, C#, AR Foundation, REST APIs, NLP
 - Developed the Unity/C# application layer for an augmented-reality language-learning platform, building 5 immersive interactive learning modules.
 - Integrated NLP and speech APIs into the Unity client to deliver real-time pronunciation feedback and automated assessment.
 - Validated the learning experience through user testing with 20 participants.

AWARDS & LEADERSHIP

- **Vice President**, IEEE Computer Science Chapter, FAST-NUCES — led a 12-member team across 4 technical events
- **Deputy Secretary Protocol**, NASCON 2025 — one of Pakistan's largest student tech conferences

TECHNICAL SKILLS

- **Languages**: JavaScript (ES6+), TypeScript, Python, C++, C#, SQL, HTML5, CSS3
- **Frontend**: React.js, Next.js, Redux, Tailwind CSS, Responsive Web Design, Reusable Component Design
- **Backend**: Node.js, Express.js, REST APIs, gRPC, Microservices, JWT Authentication, Third-Party API Integration, Webhooks
- **Databases**: MongoDB, Mongoose, MySQL, Query Optimization & Indexing
- **AI & Data**: AI Agent Integration, LLM APIs, Generative AI, NLP, Prompt Engineering, Streamlit
- **DevOps & Tools**: Docker, Git, GitHub, GitHub Actions, CI/CD, Jira, Linux, Agile/Scrum

VOLUNTEER EXPERIENCE

- **Event Organizer**, IEEE International Multitopic Conference (INMIC), FAST-NUCES (2022) — coordinated event logistics and supported operations for an international research conference.
- **Volunteer**, Ideas Foundation, Islamabad (May 2022 – September 2024) — organized charity events and community support initiatives for underprivileged groups.
