EDUCATION

- **National University of Computer and Emerging Sciences (FAST-NUCES)** Islamabad, Pakistan
Bachelor of Science in Computer Science September 2021 – June 2025
 - **Relevant Coursework:** Operating Systems, Data Structures & Algorithms, Artificial Intelligence, Computer Networks, Databases, Object-Oriented Programming, Web Development, Natural Language Processing

SKILLS SUMMARY

- **Languages:** JavaScript, Python, C++, SQL
- **Frameworks & Libraries:** Node.js, Express.js, React.js (MERN Stack)
- **Tools & Technologies:** Docker, Git, MongoDB, MySQL, Jenkins, REST APIs
- **Soft Skills:** Leadership, Team Collaboration, Communication, Time Management

EXPERIENCE

- **Agentic Dream** Remote
JavaScript Developer January 2026 – Present
 - **Product Development:** Developed and maintained internal tools for Agentic Dream, contributing to core product workflows and usability.
 - **Frontend Engineering:** Built and optimized dynamic user interfaces using JavaScript, improving responsiveness and user experience.
 - **Debugging & Enhancements:** Identified and resolved bugs while implementing feature enhancements, improving system stability and performance.
- **Dafinitiq AI** Islamabad, Pakistan
Full Stack Developer April 2026 – June 2026
 - **Full Stack Development:** Developing scalable web applications using the MERN stack, contributing to both frontend interfaces and backend services across multiple projects.
 - **Performance & Optimization:** Improving application performance and responsiveness by optimizing component rendering and backend query handling.
 - **Agile Collaboration:** Working in a fast-paced, collaborative environment, delivering features under tight deadlines while maintaining code quality.
- **Huawei Technologies (via Hillcrest)** Islamabad, Pakistan
Network Design Architect – Cloud Core January 2026 – March 2026
 - **Cloud Core Operations:** Worked on cloud-native telecom core systems, supporting operations and maintenance of enterprise-grade network components.
 - **Network Architecture:** Assisted in designing and analyzing scalable core network architectures with a focus on high availability and reliability.
 - **System Analysis:** Analyzed network performance and contributed to optimization efforts for improved service stability.
- **Huawei Technologies** Islamabad, Pakistan
Fresh Blood Induction Program - Intern September 2025 – December 2025
 - **Telecom Fundamentals:** Studied 2G, 3G, and 4G network architectures and analyzed real-time call flows within the Cloud Core domain.
 - **Operational Exposure:** Gained hands-on exposure to telecom workflows and supported post-sales technical operations.
- **SRS Solusi Digital** Remote / Indonesia
Full Stack Developer (MERN) November 2025
 - **Payment Integration:** Integrated DOKU Payment API to enable secure and reliable transaction processing across the platform.
 - **Logistics Automation:** Implemented Biteship API to automate shipping rate calculation and streamline order fulfillment.
 - **Full Stack Development:** Developed and maintained application features using MongoDB, Express.js, React.js, and Node.js.
- **NADRA Headquarters** Islamabad, Pakistan
AGHAAZ Summer Internship Program - Intern May 2024 – June 2024
 - **Web Application Development:** Built an asset management system to track and manage organizational resources efficiently.
 - **System Understanding:** Gained insight into large-scale data systems and network infrastructure used in national-level operations.
- **Hexler Tech** Islamabad, Pakistan
Intern January 2024
 - **Frontend Development:** Developed responsive web interfaces using React.js, HTML, CSS, and JavaScript.
 - **Reusable Components:** Built modular UI components to improve development efficiency and maintainability.
 - **Team Collaboration:** Collaborated with team members in a fast-paced environment, adapting quickly to project requirements.

PROJECTS

- **Text-to-Image Microservice (NLP, gRPC, AI Systems):** Developed a scalable microservice that generates context-aware images from text prompts using open-source generative AI models. Designed a gRPC-based architecture for efficient communication between services. Deployed using CI/CD pipelines with GitHub Actions and demonstrated via Streamlit and Postman. Focused on modularity, scalability, and API performance.
- **LingoLearn – AI-Based Language Learning Platform (FYP) [AR, NLP, Unity]:** Built an augmented reality-based language learning platform integrating NLP-driven conversational exercises and interactive AR environments. Designed immersive learning modules with real-time feedback and assessment system to enhance user engagement and retention.

HONORS AND AWARDS

- **Vice President**, IEEE Computer Science Chapter (FAST-NUCES) 2024–2025
- **Deputy Secretary Protocol**, NASCON 2025
- **Dean’s Honor List**, FAST National University

VOLUNTEER EXPERIENCE

- **IEEE International Multitopic Conference (INMIC)** FAST-NUCES, Islamabad
Event Organizer 2022
 - : Coordinated event logistics and supported international conference operations.
- **Ideas Foundation** Islamabad, Pakistan
Volunteer May 2022 – September 2024
 - : Participated in organizing charity events and community support initiatives for underprivileged groups.
